

CUSTOM DESIGN AND TEXTURAL EFFECTS WITH DYE INJECTION

Our recently installed elevator lobby runners for a Toronto law firm are a splendid example of the design flexibility we can achieve with dye injection. Nylon is a great option for heavy traffic lobby areas but that needn't preclude beautiful design. Interior designer Lynn McGregor chose several concepts from our Inspired look books. We reworked and re-coloured different options until a winner was declared. After developing the pattern for its long format, we went to work on the colours – a deep slate grey and brown background to coordinate with existing flooring, and the brighter addition of apple green and robin's egg blue carefully toned with pale ash. Contemporary, moody and elegant.

Project: Elevator lobby runners for Toronto law firm

Rug: 100% nylon, dye-injected in Denmark

Interior Designer: McGregor Design Group

Creative Matters Designer: Kayla Bortolotto
